

JACK SENECHAL

SENIOR SOFTWARE ENGINEER · CLOUD-NATIVE PLATFORMS & PIPELINES

Located in Novato, CA (Marin County)

Phone: 415-779-2701

Email: jacksenechal@gmail.com

GitHub: github.com/jacksenechal

LinkedIn: linkedin.com/in/jacksenechal

SUMMARY

- **Senior software engineer** with **15+ years** building and operating production systems, including **6+ years leading teams**
- Deep specialization in **Kubernetes, containerized microservices, and cloud-native pipeline architecture**
- Track record turning unreliable, high-incident platforms into dependable ones — **~100x reduction in errors** on a multi-system data orchestration platform
- Led **zero-downtime migrations** of production workloads onto Kubernetes, including relational, document, and cache data tiers
- Designed and operated **CI/CD and secure software delivery** pipelines across multiple environments
- Committed **mentor and coach** who grew multiple junior engineers into senior SWE and engineering management roles
- Full-stack generalist across Python, TypeScript/JavaScript, and Ruby; comfortable owning a component end to end, from architecture through on-call

INDUSTRY EXPERIENCE

Engineering Manager / Principal Software Engineer

Mavenlink / Kantata | Apr 2017 - Dec 2023 | San Francisco, CA

- **M-Bridge Integration Platform** (2 years): Led the team that rearchitected an agent-based pipeline platform performing multi-system data orchestration across many external systems. Took it from chronically unreliable to dependable: established operational metrics and monitoring that **reduced errors and incidents by ~100x**. Executed a **zero-downtime migration to Kubernetes**, including relational, document, and cache databases, with no customer-visible impact.
- **Infrastructure Platform** (4 years): Recruited and rebuilt the infrastructure and DevOps team from near-zero after mass departures. Migrated the entire Rails monolith and surrounding services ecosystem to Kubernetes. Transitioned a large legacy codebase to cloud-native Infrastructure-as-Code tooling (Terraform, Ansible, Kubernetes). Designed and operated **CI/CD pipelines for secure software delivery** across multiple environments. Led the migration off a segfaulting production MySQL stack to managed RDS, eliminating an entire class of incidents.
- **BI Data Pipeline** (3 months): Led a transition team to take ownership of the analytics data pipeline and migrated it to Kubernetes.
- **Reliability & Mentorship**: Drove a sustained reliability push that dramatically reduced on-call incidents and improved team retention. **Grew multiple junior engineers into senior SWE and Engineering Manager roles**; mentored engineers across teams and led interviewing and hiring. **Top Performer Award, 2021**.

Infrastructure Engineer

Tobiko | Mar 2024 - Oct 2024 | Remote

- Designed, implemented, and operated a scalable cloud platform supporting production customer workloads, with a focus on reliability, security, and operational excellence.
- Operated **Kubernetes** platforms across cloud environments, supporting containerized services with strong observability and incident response practices.
- Built and maintained **CI/CD pipelines** for automated build, test, and deployment, reducing manual intervention and improving delivery speed.
- Implemented infrastructure as code and automation patterns to ensure consistent, repeatable deployments.
- Python, Pulumi, GCP, GKE, Cloud Run, CircleCI, Helm, Docker.

Co-founder & Fractional CTO

Building Humane Technology | June 2025 - Mar 2026 | Remote

- Co-architected and led development of **HumaneBench.ai**, an open-source evaluation framework built on AISI Inspect. Python, containerized execution, CI-driven test automation.
- Drove product and technical roadmap including production monitoring and multi-turn evaluation.

Co-founder & Software Engineer

Alchemy Astrology (formerly Mirror Astrology) | Nov 2024 - Jul 2026 | Remote

- Full-stack product development: Ruby on Rails MVC, JavaScript, responsive UI/UX, Stripe integration, SSO authentication.
- Collaborated closely with co-founders on product direction, roadmap, and prioritization.

Lead Developer, Co-founder

Pegg | 2014 - 2017 | San Francisco, CA

- Designed, architected, and built a cross-platform mobile app from scratch (iOS/Android). Node.js backend, JS frontend, Firebase real-time systems, CI/CD to AWS/CloudFront via CircleCI.
- Established engineering workflow: pair programming, automated testing, continuous integration, and rapid deployment processes.

Earlier Career (2001 - 2014)

- **Consultant & Entrepreneur** (2008 - 2014): Founded OpenTest Pro (automated testing education). Built an e-commerce ordering system for Turnbull & Asser shirtmakers. Full-stack consulting in Ruby on Rails, Node.js, and D3 data visualization.
- **Web Developer, OnForce, Inc** (2006 - 2007): Introduced automated testing and CI. Built a comprehensive API test suite. Integrated the platform with Salesforce APIs.
- **Development Lead, JBA Network** (2003 - 2006): Lead programmer and project manager for mynewsletterbuilder.com — architected the initial release, then built and scaled the development team.

OPEN SOURCE PROJECTS

Scan MCP (2024 - Present)

MCP server for scanner automation and document digitization — a media capture and processing pipeline with smart device discovery, JSON Schema validation, and support for both local stdio and network HTTP transports. Privacy-first architecture. TypeScript/Node.js.

github.com/jacksenechal/scan-mcp

HumaneBench (2024 - Present)

Evaluation framework for measuring human-friendly behavior in AI assistants, built on AISI Inspect. Extensible scenario datasets with support for multiple LLM providers. Python.

github.com/buildinghumaneai/humanebench

SKILLS

- **Cloud & Containers:** Kubernetes, Docker, AWS, Google Cloud Platform, Helm, Terraform, Ansible, Pulumi, Cloud-Native Architecture.
- **Languages:** Python, TypeScript, JavaScript, Ruby, Bash, SQL.
- **Back-end & Data:** Microservices, Distributed Systems, API Design (REST), PostgreSQL, MySQL, MongoDB, Redis, Object-Oriented Design & Design Patterns.
- **CI/CD & Testing:** CircleCI, GitHub Actions, Make, PyTest, Automated Testing, TDD, Infrastructure as Code, Secure Software Delivery.
- **Operations:** Observability, Incident Response, On-Call Practice, Performance & Scalability Debugging, Zero-Downtime Migration.
- **Front-end:** React, Vue, HTML, CSS, Tailwind, Responsive Design.
- **Leadership:** Coaching & Mentoring, Technical Roadmap Ownership, Architectural Decision-Making, Cross-Functional Collaboration, Hiring, Agile/Scrum/Kanban.

EDUCATION

BA in Mathematics, minor in Computer Science

University of North Carolina at Asheville | May 2003

- Graduated with distinction in Mathematics. Undergraduate research in 4D fractals.

RECOMMENDATIONS

“Jack is **an exceptional engineer and leader**. He strives to **deeply understand the technology** he’s working on while remaining cognizant of the socio-technical components that may be a factor in any project. He’s thorough, detail-oriented, and outcome-oriented, which means **the solutions he architects, builds, and collaborates on come out better**. Jack also strives to be at the forefront of new technology and assess how he can leverage it. He does all this with a **strong team mentality**, is a phenomenal team player, and can **effectively delegate to help lift others’ skill sets**.”

— *Brandon Clifford, Director of DevOps, Kantata*

“Jack has **had quite a profound impact on my career**. As a young engineer, I was fortunate enough to work with Jack as my coach. He served as a great mentor, helping me build both technical and professional skills and **forming me into the engineer that I am today**. **His mentorship was a key factor in elevating me from an incoming Junior Engineer to an Engineering Manager**. Jack has a great curiosity and a strong set of technical capabilities that allow him to serve as a great example for others and a key contributor to any team!”

— *Wesley Morlock, Engineering Manager, Kantata*

“Jack is a fantastic engineer always ready to **help solve problems and more importantly, teach you how to solve them**. He guided me and my team through a bunch of challenging GitOps situations with patience and kindness, leading by example. Always diligent with his work, willing to roll up his sleeves to get things done and **find creative solutions**. Everyone would be lucky to have someone like him in their teams!”

— *Cesar Palafox Garza, Principal Software Engineer, Kantata*

“Jack is **awesome at understanding the direction teams need to go to make important improvements in Kantata’s Engineering organization as a whole**. He has been instrumental in building and implementing strategies to upgrade Ruby, Rails, and React. If I had any questions about infrastructure and Kubernetes he would be able to answer and **provide solid explanations to the entire team**.”

— *Justin Hurstwright, Principal Software Engineer, Kantata*
