

JACK SENECHAL

ENGINEERING LEADER — PLATFORM & RELIABILITY

Located in Novato, CA

Phone: 415-779-2701

Email: jacksenechal@gmail.com

GitHub: github.com/jacksenechal

LinkedIn: linkedin.com/in/jacksenechal

SUMMARY

- **Platform and reliability leader** with **15+ years** in software and **6+ years leading engineering teams** at growth-stage B2B SaaS, owning the infrastructure, integration, and DevOps platforms that product teams build on
- Built an infrastructure/platform team from scratch and **drove an organization-wide DevOps culture transformation**, setting the engineering standards, on-call practices, and operating model adopted across the eng org
- **Reliability obsessed**: established the metrics, SLOs, and incident practices that **cut platform errors and incidents ~100x**, while keeping on-call load sustainable
- Committed **coach and people-developer** who **grew multiple junior engineers into senior SWE and Engineering Manager roles** and mentored engineers across teams; leads through clarity and flow, not control
- **AI-native** by practice: built an open-source AI evaluation framework, MCP tooling, and multi-LLM products — well positioned to direct an AI-forward platform strategy
- Deep in cloud-native infrastructure (Kubernetes, IaC, multi-cloud) and stays hands-on with architecture and code review

INDUSTRY EXPERIENCE

Co-founder & Fractional CTO

Building Humane Technology | June 2025 - Mar 2026 | Remote

- Co-architecting and leading development of **HumaneBench.ai**, an open-source AI evaluation framework built on AISI Inspect. Python.
- Driving product and technical roadmap including production monitoring, multi-turn evaluation, and maturity models to guide AI tool adoption across teams.
- Coordinating open-source community engagement, hackathons, and education initiatives.

Co-founder & Software Engineer

Mirror Astrology | Nov 2024 - Present | Remote

- Built AI chatbot integrating multiple LLMs with complex prompting, tool use, and context augmentation.
- Front-end development: Ruby on Rails views, JavaScript, HTML+CSS, Tailwind, responsive UI/UX.
- Back-end development: Stripe integration, SSO authentication, Rails MVC.
- Collaborated closely with co-founders on product direction, Figma design, UX, roadmap planning, and prioritization.

Infrastructure Engineer

Tobiko | Mar 2024 - Oct 2024 | Remote

- Architected and implemented a scalable cloud platform serving customer workloads at a fast-paced startup.
- Built CI/CD patterns including mono-repo conditional workflows, workload identity federation, and continuous delivery.
- Implemented a Slack-based customer support and incident response platform; onboarded teammates and customers.
- Python, Pulumi, GCP, GKE, Cloud Run, CircleCI, Helm, SQLMesh.

Engineering Manager / Principal Software Engineer

Mavenlink / Kantata | Apr 2017 - Dec 2023 | San Francisco, CA

- **Infrastructure & Reliability Platform** (4 years): Recruited and built a new platform team from scratch and **led the organization's DevOps culture transformation**, defining the reliability, on-call, and CI/CD standards adopted across product teams. Owned the platform roadmap, requirements triage, and priority management while staying hands-on with architecture and code review. Migrated a large legacy codebase to cloud-native Infrastructure-as-Code (Terraform, Ansible, Kubernetes).

- **M-Bridge Integration Platform** (2 years): Led a team to stabilize and scale an agent-based integration platform handling multi-system data orchestration. **Established the SLOs, operational metrics, and monitoring that reduced errors and incidents by ~100x** and turned a chronic source of escalations into a dependable foundation. Executed a zero-downtime migration to Kubernetes including relational, document, and cache databases.
- **BI Data Pipeline** (3 months): Led a transition team to take ownership of and improve the analytics data pipeline. Migrated the pipeline to Kubernetes.
- **Organization-wide leadership**: Set engineering standards and drove change management across the eng org, partnering with leadership on hiring and process. **Developed people, not just systems** — grew multiple junior engineers into senior SWE and Engineering Manager roles and mentored engineers across multiple teams. **Top Performer Award, 2021.**

Lead Developer, Co-founder

Pegg | 2014 - 2017 | San Francisco, CA

- Designed, architected, and built a cross-platform mobile app from scratch (iOS/Android). Node.js backend, JS/Phonegap frontend, Firebase real-time systems, CI/CD to AWS/CloudFront via CircleCI.
- Established engineering workflow: pair programming, automated testing (Karma/Chai), continuous integration, and rapid deployment processes.
- Co-led product strategy, monetization, and launch planning.

Earlier Career (2001 - 2014)

- **Consultant & Entrepreneur** (2008 - 2014): Founded OpenTest Pro (automated testing education). Built e-commerce ordering system for Turnbull & Asser shirtmakers. Full-stack consulting in Ruby on Rails, Node.js, D3 data visualization. Rapid prototyping and client delivery.
- **Web Developer, OnForce, Inc** (2006 - 2007): Introduced automated testing and CI. Built comprehensive API test suite. Integrated platform with Salesforce APIs.
- **Development Lead, JBA Network** (2003 - 2006): Lead programmer and project manager for mynewsletterbuilder.com — architected initial release, then built and scaled the development team.

OPEN SOURCE PROJECTS

Scan MCP (2024 - Present)

MCP (Model Context Protocol) server for scanner automation and document digitization. Privacy-first architecture with smart device discovery, JSON Schema validation, and support for both local stdio and network HTTP transports. TypeScript/Node.js.

github.com/jacksenechal/scan-mcp

HumaneBench (2024 - Present)

Evaluation framework for measuring human-friendly behavior in AI assistants, built on AISI Inspect. Tests AI responses across humane technology principles including loneliness, mental health, transparency, and privacy. Supports multiple LLM providers with extensible scenario datasets. Python.

github.com/buildinghumanetech/humanebench

SKILLS

- **Languages & Frameworks**: JavaScript, TypeScript, Python, Ruby on Rails, Node.js, Bash.
- **Front-end**: React, Vue, HTML, CSS, Tailwind, Responsive Design, UI/UX.
- **Back-end & Data**: API Design, Microservices, Distributed Systems, PostgreSQL, MySQL, MongoDB, Redis.
- **Cloud & Infrastructure**: AWS, Google Cloud Platform, Kubernetes, Docker, Terraform, Ansible, Pulumi, Helm.
- **Platform & Reliability**: Platform Engineering, SRE, SLOs & Error Budgets, Incident Response, On-Call Practices, Developer Productivity, Observability/Monitoring.
- **CI/CD & DevOps**: CircleCI, GitHub Actions, Automated Testing, TDD, Testing Frameworks, Infrastructure as Code, Cloud-Native Architecture.
- **AI/LLM**: MCP (Model Context Protocol), AI evaluation frameworks, chatbot development, prompt engineering, tool use, context augmentation.
- **Leadership**: Engineering Standards, Org Design & Operating Model, Developing Managers & Engineers, Roadmap Ownership, Cross-Team Dependency Management, Hiring, Change Management, Agile/Scrum/Kanban.

EDUCATION

BA in Mathematics, minor in Computer Science

University of North Carolina at Asheville | May 2003

- Graduated with distinction in Mathematics. Undergraduate research in 4D fractals.

RECOMMENDATIONS

“Jack is **an exceptional engineer and leader**. He strives to **deeply understand the technology** he’s working on while remaining cognizant of the socio-technical components that may be a factor in any project. He’s thorough, detail-oriented, and outcome-oriented, which means **the solutions he architects, builds, and collaborates on come out better**. Jack also strives to be at the forefront of new technology and assess how he can leverage it. He does all this with a **strong team mentality**, is a phenomenal team player, and can **effectively delegate to help lift others’ skill sets**.”

— *Brandon Clifford, Director of DevOps, Kantata*

“Jack has **had quite a profound impact on my career**. As a young engineer, I was fortunate enough to work with Jack as my coach. He served as a great mentor, helping me build both technical and professional skills and **forming me into the engineer that I am today**. **His mentorship was a key factor in elevating me from an incoming Junior Engineer to an Engineering Manager**. Jack has a great curiosity and a strong set of technical capabilities that allow him to serve as a great example for others and a key contributor to any team!”

— *Wesley Morlock, Engineering Manager, Kantata*

“Jack is a fantastic engineer always ready to **help solve problems and more importantly, teach you how to solve them**. He guided me and my team through a bunch of challenging GitOps situations with patience and kindness, leading by example. Always diligent with his work, willing to roll up his sleeves to get things done and **find creative solutions**. Everyone would be lucky to have someone like him in their teams!”

— *Cesar Palafox Garza, Principal Software Engineer, Kantata*

“Jack is **awesome at understanding the direction teams need to go to make important improvements in Kantata’s Engineering organization as a whole**. He has been instrumental in building and implementing strategies to upgrade Ruby, Rails, and React. If I had any questions about infrastructure and Kubernetes he would be able to answer and **provide solid explanations to the entire team**.”

— *Justin Hurstwright, Principal Software Engineer, Kantata*
