

JACK SENECHAL

FULL STACK & AI ENGINEER

Located in Novato, CA

Phone: 415-779-2701

Email: jacksenechal@gmail.com

GitHub: github.com/jacksenechal

LinkedIn: linkedin.com/in/jacksenechal

SUMMARY

- **Senior full-stack engineer** shipping AI-powered applications end-to-end — LLM integration, prompt engineering, tool use, Rails/React UI, cloud-native deployment
- **15+ years** building and shipping software, with **6+ years leading teams** as tech lead, architect, and engineering manager
- Consultative engineer comfortable **partnering with non-technical stakeholders** to scope, prototype, and deliver custom solutions for real users
- Hands-on with modern AI tooling: multi-LLM application development, MCP servers, AI evaluation frameworks, agentic coding workflows
- Strength in **technical leadership and architecture**: roadmapping, system design, mentoring, and stewarding rag-tag teams to durable outcomes
- Entrepreneurial spirit with multiple co-founding experiences

INDUSTRY EXPERIENCE

Co-founder & Fractional CTO

Building Humane Technology | June 2025 - Mar 2026 | Remote

- Co-architecting and leading development of **HumaneBench.ai**, an open-source AI evaluation framework built on AISI Inspect. Python.
- Developing extensible evaluation tooling focused on measuring and improving LLM behavior in real-world developer and operational workflows.
- Shaping product and technical roadmap for AI-driven tooling, including production monitoring, multi-turn evaluation, and maturity models for adoption and continuous improvement.

Co-founder & Software Engineer

Mirror Astrology | Nov 2024 - Present | Remote

- Built and shipped a production AI chatbot end-to-end: multi-LLM integration with complex prompting, tool use, and context augmentation, exposed through a polished consumer web app.
- Full-stack development: Ruby on Rails MVC, Stripe integration, SSO authentication; React-flavored Rails views, JavaScript, HTML+CSS, Tailwind, responsive UI/UX.
- Translated co-founders' product vision and Figma designs into working features; owned roadmap, prioritization, and customer-facing iteration cycles.

Infrastructure Engineer

Tobiko | Mar 2024 - Oct 2024 | Remote

- Architected and implemented a scalable cloud platform serving customer workloads at a fast-paced startup.
- Built CI/CD patterns including mono-repo conditional workflows, workload identity federation, and continuous delivery.
- Implemented a Slack-based customer support and incident response platform; onboarded teammates and customers.
- Python, Pulumi, GCP, GKE, Cloud Run, CircleCI, Helm, SQLMesh.

Engineering Manager / Principal Software Engineer

Mavenlink / Kantata | Apr 2017 - Dec 2023 | San Francisco, CA

- **M-Bridge Integration Platform** (2 years): Led a team to stabilize and scale an agent-based integration platform handling multi-system data orchestration. Established operational metrics and monitoring that reduced errors and incidents by ~100x. Executed a zero-downtime migration to Kubernetes including relational, document, and cache databases.

- **Infrastructure Platform** (4 years): Recruited and built a new team from scratch dedicated to the infrastructure platform. Led the organization's DevOps culture transformation, serving as a change agent and technical authority across engineering. Owned roadmap stewardship, requirements triage, and priority management while staying hands-on with coding, architecture, and code review. Transitioned a large legacy codebase to cloud-native, Infrastructure-as-Code tooling (Terraform, Ansible, Kubernetes).
- **BI Data Pipeline** (3 months): Led a transition team to take ownership of and improve the analytics data pipeline. Migrated the pipeline to Kubernetes.
- **Cross-Functional Impact:** Mentored engineers across teams — notably coached a junior engineer who grew to Engineering Manager. Led interviewing and hiring. Drove organizational change management and process optimization. **Top Performer Award, 2021.**

Lead Developer, Co-founder

Pegg | 2014 - 2017 | San Francisco, CA

- Designed, architected, and built a cross-platform mobile app from scratch (iOS/Android). Node.js backend, JS/Phonegap frontend, Firebase real-time systems, CI/CD to AWS/CloudFront via CircleCI.
- Established engineering workflow: pair programming, automated testing (Karma/Chai), continuous integration, and rapid deployment processes.
- Co-led product strategy, monetization, and launch planning.

Earlier Career (2001 - 2014)

- **Consultant & Entrepreneur** (2008 - 2014): Founded OpenTest Pro (automated testing education). Built e-commerce ordering system for Turnbull & Asser shirtmakers. Full-stack consulting in Ruby on Rails, Node.js, D3 data visualization. Rapid prototyping and client delivery.
- **Web Developer, OnForce, Inc** (2006 - 2007): Introduced automated testing and CI. Built comprehensive API test suite. Integrated platform with Salesforce APIs.
- **Development Lead, JBA Network** (2003 - 2006): Lead programmer and project manager for mynewsletterbuilder.com — architected initial release, then built and scaled the development team.

OPEN SOURCE PROJECTS

Scan MCP (2024 - Present)

MCP (Model Context Protocol) server for scanner automation and document digitization. Privacy-first architecture with smart device discovery, JSON Schema validation, and support for both local stdio and network HTTP transports. TypeScript/Node.js.

github.com/jacksenechal/scan-mcp

HumaneBench (2024 - Present)

Evaluation framework for measuring human-friendly behavior in AI assistants, built on AISI Inspect. Tests AI responses across humane technology principles including loneliness, mental health, transparency, and privacy. Supports multiple LLM providers with extensible scenario datasets. Python.

github.com/buildinghumanetech/humanebench

SKILLS

- **AI/LLM:** LLM application development, prompt engineering, tool use, context augmentation, multi-LLM integration, AI evaluation (AISI Inspect), MCP (Model Context Protocol), agentic coding workflows.
- **Languages & Frameworks:** JavaScript, TypeScript, Python, Ruby on Rails, Node.js, Bash.
- **Front-end:** React, Vue, HTML, CSS, Tailwind, Responsive Design, UI/UX.
- **Back-end & Data:** API Design, Microservices, Distributed Systems, PostgreSQL, MySQL, MongoDB, Redis.
- **Cloud & Infrastructure:** AWS, Google Cloud Platform, Kubernetes, Docker, Terraform, Pulumi, Helm.
- **CI/CD & DevOps:** CircleCI, GitHub Actions, Automated Testing, TDD, Infrastructure as Code.
- **Collaboration:** Partnering with non-technical stakeholders, requirements scoping, technical writing, mentoring, cross-functional delivery.

EDUCATION

BA in Mathematics, minor in Computer Science

University of North Carolina at Asheville | May 2003

- Graduated with distinction in Mathematics. Undergraduate research in 4D fractals.

RECOMMENDATIONS

“Jack is **an exceptional engineer and leader**. He strives to **deeply understand the technology** he’s working on while remaining cognizant of the socio-technical components that may be a factor in any project. He’s thorough, detail-oriented, and outcome-oriented, which means **the solutions he architects, builds, and collaborates on come out better**. Jack also strives to be at the forefront of new technology and assess how he can leverage it. He does all this with a **strong team mentality**, is a phenomenal team player, and can **effectively delegate to help lift others’ skill sets**.”

— *Brandon Clifford, Director of DevOps, Kantata*

“Jack has **had quite a profound impact on my career**. As a young engineer, I was fortunate enough to work with Jack as my coach. He served as a great mentor, helping me build both technical and professional skills and **forming me into the engineer that I am today**. **His mentorship was a key factor in elevating me from an incoming Junior Engineer to an Engineering Manager**. Jack has a great curiosity and a strong set of technical capabilities that allow him to serve as a great example for others and a key contributor to any team!”

— *Wesley Morlock, Engineering Manager, Kantata*

“Jack is a fantastic engineer always ready to **help solve problems and more importantly, teach you how to solve them**. He guided me and my team through a bunch of challenging GitOps situations with patience and kindness, leading by example. Always diligent with his work, willing to roll up his sleeves to get things done and **find creative solutions**. Everyone would be lucky to have someone like him in their teams!”

— *Cesar Palafox Garza, Principal Software Engineer, Kantata*

“Jack is **awesome at understanding the direction teams need to go to make important improvements in Kantata’s Engineering organization as a whole**. He has been instrumental in building and implementing strategies to upgrade Ruby, Rails, and React. If I had any questions about infrastructure and Kubernetes he would be able to answer and **provide solid explanations to the entire team**.”

— *Justin Hurstwright, Principal Software Engineer, Kantata*
